

Antonio Carmagnani

Copenhagen, DK • +45 71 49 62 06 • antoniocarmagnani@gmail.com

PROFILE

Experience across real estate development and sustainability consulting, from feasibility and financial modeling to ESG due diligence, building energy assessment, and climate risk work on internationally financed infrastructure. Recently completed an M.Arch. in Architecture Computation at The Royal Danish Academy, with a focus on data-driven approaches to real estate and sustainability. Hands-on skills span feasibility and financial modeling, building energy and environmental performance analysis, GIS, and structured analytical tools in Excel, Power BI, and Python. Motivated by work where real estate, sustainability, and rigorous analysis intersect.

EXPERIENCE

Project Assistant in International Infrastructure Projects @ Sweco Danmark A/S

Copenhagen, DK

02.2026 - 07.2026

- Supported advisory teams on capital-intensive water, energy, and transport assets financed by development banks including the World Bank, EBRD, KfW and EIB, working to the appraisal and reporting standards those lenders require.
- Assessed physical climate risk across major water infrastructure assets under lender climate-proofing standards (JASPERS, EBRD), rating each asset to inform adaptation and investment decisions.
- Developed a pricing tool to support bid decisions, parametrizing expert fee bands and project economics for financial viability.
- Built geospatial databases for water and infrastructure projects in QGIS, compiling georeferenced asset data, satellite imagery, and open sources for socio-spatial analysis.
- Supported the setup of a new Sweco branch office in Bangladesh, drafting employment contracts and managing the full insurance onboarding.
- Engaged national water agencies and government counterparts during the field missions to align on rehabilitation priorities and collect technical and geographic project data.

Intern in Responsible Business Conduct @ Ramboll Management Consulting

Copenhagen, DK

05.2025 - 08.2025

- Conducted due diligence for corporate and real estate investment clients, applying the UN Guiding Principles and OECD Guidelines to identify and prioritise material risks across assets and supply chains.
- Reviewed and strengthened the Code of Conduct of real estate investment managers, identifying gaps against international human rights standards to reduce its exposure to risks.
- Developed the firm's real estate ESG due diligence services, centered on building energy and decarbonization assessments aligned with EU building performance regulations.
- Built a fully automated risk-assessment system in Excel, consolidating risk data across supply chains into a single dashboard that updated salient risks dynamically.

Architect @ Isay Weinfeld Architects

São Paulo, BR

02.2023 - 08.2024

- Delivered residential, hotel, and mixed-use developments across South America, North America, Europe, the Middle East, and Asia at one of Brazil's most prominent architecture firms, from feasibility through construction.
- Carried developments past feasibility into delivery, taking them through design development, technical documentation, and construction on buildings.

Trainee in Real Estate Product Development @ OSPA

São Paulo, BR

02.2022 - 10.2022

- Produced 15+ feasibility studies for mixed-use and residential developments across Brazil and the US (São Paulo, Rio de Janeiro, Porto Alegre, Miami) for developer clients.
- Ran financial feasibility studies on candidate sites, sizing investment and return against buildable area, unit mix, price per square metre, and parking to test viability.
- Analyzed municipal master plans and land-use law to determine development potential, unit counts, apartment sizing, and setback rules, identifying regulatory opportunities to maximize buildable value.
- Produced images, plans, and diagrams and presented feasibility outcomes to developer clients.

Architect @ Felipe Hess Architects

São Paulo, BR

07.2021 - 02.2022

- Developed residential and commercial buildings in São Paulo and Rio de Janeiro from land-use and feasibility analysis through technical documentation and construction.
- Took part in the studio's first ground-up residential building, following it from land-use and capacity analysis through design development and construction.
- Ran financial feasibility alongside the regulatory analysis, testing saleable area, unit mix, and development cost against the buildable programme.

Intern in Project Management @ Itaú-Unibanco

São Paulo, BR

08.2020 - 07.2021

- Reviewed technical and regulatory documentation on the bank's real estate projects, checking design against Brazilian building, accessibility, and fire-safety standards (NBR) as a compliance gate before construction was authorised.
- Assessed the environmental and energy performance of buildings the bank was acquiring or leasing, reviewing consumption data, efficiency ratings, and certifications as part of internal due diligence.
- Supported technical review of new office towers under construction at the bank's São Paulo headquarters campus, evaluating design documentation for regulatory compliance and environmental performance.
- Built a VBA-powered Excel dashboard tracking the bank's corporate furniture inventory across locations, replacing a manual process and speeding up procurement for new-building fit-outs.

	Independent Consultant @ Self-employed <i>07.2018 - Present</i> • Took on independent projects, software, and consulting for clients across the AEC sector, alongside studies and full-time roles. • Co-founded and ran a small practice delivering projects for 10+ clients in the AEC sector, responsible for client acquisition, scoping, pricing, and delivery. • Built an Excel and VBA financial analysis tool for a private client that ingests monthly statements and PDF exports, categorises transactions automatically, and renders them into a decision dashboard.	São Paulo, BR and Copenhagen, DK
EDUCATION	M.Arch. in Architecture Computation @ The Royal Danish Academy <i>07.2024 - 07.2026</i> Semester Programme in Building Technology @ Architecture Association <i>07.2022 - 01.2023</i> Summer School in Parametric Design @ Architecture Association <i>06.2019 - 07.2019</i> B.Arch. in Architecture and Urbanism @ Mackenzie University <i>07.2018 - 12.2023</i>	Copenhagen, DK London, UK São Paulo, BR
PROJECTS	House Price Prediction - Competition • Built a predictive model for real estate valuation using ensemble learning (XGBoost, LightGBM, Ridge, CatBoost) and feature engineering on structured property and financial data, finishing in the top 2% of competitors. Real Estate Development Recommendation Tool @ The Royal Danish Academy • Built a machine learning tool that generates site-specific development recommendations for buildings in Copenhagen by integrating financial, social, sustainability, and geospatial data. • Designed a user interface allowing different stakeholders to adjust impact drivers and weighting, with predictive outputs aligned to ESG priorities and local development conditions. Master's Thesis, Computational Urban Analysis for Intensification Strategy @ The Royal Danish Academy • Developed a computational framework to identify underused spaces in the historic city center of São Paulo, Brazil, combining urban morphology analysis, land use data, and social vulnerability indicators. • Built an algorithm that uses urban data, including building typology, use patterns, regulatory conditions, and building use, to generate programmatic and morphological typologies for urban intensification, aligned with the city's existing urban policies. • Integrated multiple geospatial datasets in QGIS to map spatial relationships between buildings, zoning conditions, and social context at the neighborhood scale.	Copenhagen, DK Copenhagen, DK Copenhagen, DK
SKILLS	• Real Estate & Urban: Real estate feasibility modeling, Zoning and land use regulatory analysis, Urban morphology and spatial analysis • Data & Analysis: Python, QGIS, SQL, Power BI, Excel / VBA, HTML • ESG & Sustainability: CSRD, Double Materiality, EU Taxonomy, UNGPs, OECD Guidelines, HRDD, HRIA, LCA (Life Cycle Assessment) • Languages: English (fluent), Portuguese (native), Spanish (fluent), Danish (limited working proficiency), Italian (limited working proficiency)
