PROFILE

Experience across sustainability consulting and the built environment, from ESG and human rights due diligence to climate risk work on internationally financed infrastructure. Recently completed a Master's Degree in Architecture Computation at The Royal Danish Academy, with a focus on data-driven approaches to sustainability. Hands-on skills span the UNGP and OECD due-diligence frameworks, climate hazard and risk assessment, and building structured analytical tools in Excel and Python. Motivated by work where sustainability, the built environment, and rigorous analysis intersect.

EXPERIENCE

Project Assistant in International Infrastructure Projects @ Sweco Danmark A/S

Copenhagen, DK

02.2026 - 07.2026

- Support consulting teams delivering internationally funded infrastructure projects in water, energy, and transport across emerging and developing economies, financed by development banks including the World Bank, EBRD, IFDK, KfW and EIB.
- Authored climate risk assessments for major water supply projects following JASPERS and EBRD climate-proofing guidance, screening hazards against projections data and rating risk by exposure and vulnerability for each asset.
- Developed a pricing tool to support bid decisions, parametrizing expert fee bands and project economics for financial viability.
- Built geospatial databases for water and infrastructure projects in QGIS, compiling georeferenced asset data, satellite imagery, and open sources for socio-spatial analysis.
- Engaged national water agencies and government counterparts during the field missions to align on rehabilitation priorities and collect technical and geographic project data.

Intern in Responsible Business Conduct @ Ramboll Management Consulting

Copenhagen, DK

05.2025 - 08.2025

- Conducted human rights due diligence for corporate clients, applying the UN Guiding Principles on Business and Human Rights and OECD Guidelines to assess salient risks across global supply chains.
- Mapped the global supply chains of 20+ critical raw materials under the EU Critical Raw Materials Act, profiling producing companies, sectors, and geographies from authoritative industry databases.
- Built a fully automated risk-assessment system in Excel, consolidating risk data across supply chains into a single dashboard that updated salient risks dynamically.
- Integrated AI research tools into due diligence workflows to source and cite human rights risk data at scale across high research volumes.
- Ran a peer benchmarking analysis for a corporate client, comparing its responsible business and human rights practices against industry competitors across multiple service areas to identify gaps, competitive advantages, and opportunities to strengthen its positioning.

Architect @ Isay Weinfeld Architects

São Paulo, BR

02.2023 - 08.2024

- Delivered high-end residential, hotel, and mixed-use projects across South America, North America, Europe, the Middle East, and Asia at one of Brazil's most prominent architecture studios.
- Built a Grasshopper plugin in Python that generates bespoke staircases from a floor plan, cutting staircase modeling from days to around 20 minutes and enabling far more design iterations and geometric complexity.

Trainee in Real Estate Product Development @ OSPA

São Paulo, BR

02.2022 - 10.2022

- Produced 15+ feasibility studies for mixed-use and residential developments across Brazil and the US (São Paulo, Rio de Janeiro, Porto Alegre, Miami) for developer clients.
- Ran financial feasibility studies on candidate sites, sizing investment and return against buildable area, unit mix, price per square metre, and parking to test viability.

Architect @ Felipe Hess Architects

São Paulo, BR

07.2021 - 02.2022

- Developed high-end residential projects in São Paulo and Rio de Janeiro from preliminary studies through technical documentation, working in Revit, AutoCAD, and SketchUp.

Intern in Project Management @ Itaú-Unibanco

São Paulo, BR

08.2020 - 07.2021

- Reviewed technical documentation from architecture and engineering firms prior to construction authorization, checking drawings against building, accessibility, and fire-safety norms (NBR standards).
- Assessed the environmental and energy performance of buildings the bank was acquiring or leasing, reviewing consumption data, efficiency ratings, and certifications as part of internal due diligence.

Independent Consultant @ Self-employed

São Paulo, BR and Copenhagen, DK

07.2018 - Present

- Delivered independent consulting to clients across the AEC sector, spanning product and UX advice, Revit and Dynamo automation, and financial analysis tooling.
- Co-founded and ran a small practice delivering projects for 10+ clients in the AEC sector, responsible for client acquisition, scoping, pricing, and delivery.
- Advised a software startup in the built environment over two years on product direction, UI and UX, and applied AI, testing releases and returning improved Revit and Dynamo scripts.
- Built an Excel and VBA financial analysis tool for a private client that ingests monthly statements and PDF exports, categorises transactions automatically, and renders them into a decision dashboard.

EDUCATION

Master's Degree in Architecture Computation @ The Royal Danish Academy

Copenhagen, DK

07.2024 - 07.2026

	Semester Programme in Building Technology @ Architecture Association <i>07.2022 - 01.2023</i>	London, UK
	Summer School in Parametric Design @ Architecture Association <i>06.2019 - 07.2019</i>	London, UK
	Bachelor's Degree in Architecture and Urbanism @ Mackenzie University <i>07.2018 - 12.2023</i>	São Paulo, BR

PROJECTS	House Price Prediction - Competition	Copenhagen, DK
	Built a predictive model for real estate valuation using ensemble learning (XGBoost, LightGBM, Ridge, CatBoost) and feature engineering on structured property and financial data, finishing in the top 2% of competitors.	
	Real Estate Development Recommendation Tool @ The Royal Danish Academy	Copenhagen, DK
	- Built a machine learning tool that generates site-specific development recommendations for buildings in Copenhagen by integrating financial, social, sustainability, and geospatial data. - Designed a user interface allowing different stakeholders to adjust impact drivers and weighting, with predictive outputs aligned to ESG priorities and local development conditions.	
	Master's Thesis, Computational Urban Analysis for Intensification Strategy @ The Royal Danish Academy	Copenhagen, DK
	- Developed a computational framework to identify underused spaces in the historic city center of São Paulo, Brazil, combining urban morphology analysis, land use data, and social vulnerability indicators. - Built an algorithm that uses urban data, including building typology, use patterns, regulatory conditions, and building use, to generate programmatic and morphological typologies for urban intensification, aligned with the city's existing urban policies. - Integrated multiple geospatial datasets in QGIS to map spatial relationships between buildings, zoning conditions, and social context at the neighborhood scale.	
SKILLS	- Data & Analysis: Python, QGIS, SQL, Power BI, Excel / VBA, HTML - ESG & Sustainability: CSRD, Double Materiality, EU Taxonomy, UNGPs, OECD Guidelines, HRDD, HRIA, LCA (Life Cycle Assessment) - Languages: English (fluent), Portuguese (native), Spanish (fluent), Danish (limited working proficiency), Italian (limited working proficiency)
