PROFILE

Experience across real estate development and sustainability consulting, from feasibility and financial modeling to ESG due diligence, building energy assessment, and climate risk work on internationally financed infrastructure. Recently completed an M.Arch. in Architecture Computation at The Royal Danish Academy, with a focus on data-driven approaches to real estate and sustainability. Hands-on skills span feasibility and financial modeling, building energy and environmental performance analysis, GIS, and structured analytical tools in Excel, Power BI, and Python. Motivated by work where real estate, sustainability, and rigorous analysis intersect.

EXPERIENCE

Project Assistant in International Infrastructure Projects @ Sweco Danmark A/S

Copenhagen, DK

02.2026 - 07.2026

- Support consulting teams delivering internationally funded infrastructure projects in water, energy, and transport across emerging and developing economies, financed by development banks including the World Bank, EBRD, IFDK, KfW and EIB.
- Reviewed engineering designs across multiple infrastructure projects under FIDIC Yellow Book arrangements, checking specifications against subconsultants' technical drawings.
- Assembled bid teams for competitive international tenders, sourcing specialist consultants to evidence the local and technical expertise.
- Developed a pricing tool to support bid decisions, parametrizing expert fee bands and project economics for financial viability.

Intern in Responsible Business Conduct @ Ramboll Management Consulting

Copenhagen, DK

05.2025 - 08.2025

- Developed the firm's real estate ESG due diligence services, centered on building energy and decarbonization assessments aligned with EU building performance regulations.
- Produced a supplier-facing human rights resource for real estate clients, mapping Code of Conducts to international instruments (UDHR, ICESCR, ICCPR) to help contractors and subcontractors meet labor expectations on site.
- Conducted due diligence for corporate and real estate investment clients, applying the UN Guiding Principles and OECD Guidelines to identify and prioritise material risks across assets and supply chains.

Architect @ Isay Weinfeld Architects

São Paulo, BR

02.2023 - 08.2024

- Delivered residential, hotel, and mixed-use developments across South America, North America, Europe, the Middle East, and Asia at one of Brazil's most prominent architecture firms, from feasibility through construction.
- Carried developments past feasibility into delivery, taking them through design development, technical documentation, and construction on buildings.
- Coordinated multidisciplinary inputs (structural, HVAC, electrical, lighting) into a single Revit model.

Trainee in Real Estate Product Development @ OSPA

São Paulo, BR

02.2022 - 10.2022

- Produced 15+ feasibility studies for mixed-use and residential developments across Brazil and the US (São Paulo, Rio de Janeiro, Porto Alegre, Miami) for developer clients.
- Produced images, plans, and diagrams and presented feasibility outcomes to developer clients.

Architect @ Felipe Hess Architects

São Paulo, BR

07.2021 - 02.2022

- Developed residential and commercial buildings in São Paulo and Rio de Janeiro from land-use and feasibility analysis through technical documentation and construction.
- Produced BIM documentation in Revit and construction drawings across design phases.

Intern in Project Management @ Itaú-Unibanco

São Paulo, BR

08.2020 - 07.2021

- Reviewed technical documentation from architecture and engineering firms prior to construction authorization, checking drawings against building, accessibility, and fire-safety norms (NBR standards).
- Assessed the environmental and energy performance of buildings the bank was acquiring or leasing, reviewing consumption data, efficiency ratings, and certifications as part of internal due diligence.
- Supported technical review of new office towers under construction at the bank's São Paulo headquarters campus, evaluating design documentation for compliance and environmental performance.
- Built a VBA-powered Excel dashboard tracking the bank's corporate furniture inventory across locations, replacing a manual process and speeding up procurement for new-building fit-outs.

Independent Consultant @ Self-employed

São Paulo, BR and Copenhagen, DK

07.2018 - Present

- Took on independent projects, software, and consulting for clients across the AEC sector, alongside studies and full-time roles.
- Co-founded and ran a small practice delivering projects for 10+ clients in the AEC sector, responsible for client acquisition, scoping, pricing, and delivery.
- Built an Excel and VBA financial analysis tool for a private client that ingests monthly statements and PDF exports, categorises transactions automatically, and renders them into a decision dashboard.

EDUCATION

M.Arch. in Architecture Computation @ The Royal Danish Academy

Copenhagen, DK

07.2024 - 07.2026

Semester Programme in Building Technology @ Architecture Association

London, UK

07.2022 - 01.2023

Summer School in Parametric Design @ Architecture Association

London, UK

06.2019 - 07.2019

07.2018 - 12.2023

PROJECTS**Real Estate Development Recommendation Tool @ The Royal Danish Academy****Copenhagen, DK**

- Built a machine learning tool that generates site-specific development recommendations for buildings in Copenhagen by integrating financial, social, sustainability, and geospatial data.
- Designed a user interface allowing different stakeholders to adjust impact drivers and weighting, with predictive outputs aligned to ESG priorities and local development conditions.

Rammed Blue Biomass & Computational Optimization @ The Royal Danish Academy**Copenhagen, DK**

- Developed a new construction technique and material system using blue biomass (seashells and algae), applying LCA metrics and parametric simulations to optimize structural performance and environmental impact.
- Project was selected as a semester highlight and served as the material foundation for the school's installation at the Venice Architecture Biennale 2025, presented in collaboration with CITA, GXN, and 3XN at the Arsenale.

Master's Thesis, Computational Urban Analysis for Intensification Strategy @ The Royal Danish Academy**Copenhagen, DK**

- Developed a computational framework to identify underused spaces in the historic city center of São Paulo, Brazil, combining urban morphology analysis, land use data, and social vulnerability indicators.
- Built an algorithm that uses urban data, including building typology, use patterns, regulatory conditions, and building use, to generate programmatic and morphological typologies for urban intensification, aligned with the city's existing urban policies.
- Integrated multiple geospatial datasets in QGIS to map spatial relationships between buildings, zoning conditions, and social context at the neighborhood scale.

SKILLS

- Real Estate & Urban: Real estate feasibility modeling, Zoning and land use regulatory analysis, Urban morphology and spatial analysis
- ESG & Sustainability: CSRD, Double Materiality, EU Taxonomy, UNGPs, OECD Guidelines, HRDD, HRIA, LCA (Life Cycle Assessment)
- Data & Analysis: Python, QGIS, SQL, Power BI, Excel / VBA, HTML
- Languages: English (fluent), Portuguese (native), Spanish (fluent), Danish (limited working proficiency), Italian (limited working proficiency)
