

Antonio Carmagnani

Copenhagen, DK • +45 71 49 62 06 • antoniocarmagnani@gmail.com

PROFILE

Experience in architecture and interior projects at high-end studios, from concept and three-dimensional visualization through to technical and production documentation. Master's Degree in Architecture Computation at The Royal Danish Academy, with a focus on materials, geometry, and fabrication. Hands-on skills span Rhino and Grasshopper, Revit, AutoCAD and the Adobe Suite, facade and envelope detailing, and architectural visualization. Motivated by work where design intent survives into how a thing is actually made.

EXPERIENCE

Project Assistant in International Infrastructure Projects @ Sweco Danmark A/S

Copenhagen, DK

02.2026 - 07.2026

- Support consulting teams delivering internationally funded infrastructure projects in water, energy, and transport across emerging and developing economies, financed by development banks including the World Bank, EBRD, IFDK, KfW and EIB.
- Reviewed engineering designs across multiple infrastructure projects under FIDIC Yellow Book arrangements, checking specifications against subconsultants' technical drawings.

Intern in Responsible Business Conduct @ Ramboll Management Consulting

Copenhagen, DK

05.2025 - 08.2025

- Conducted human rights due diligence for corporate clients, applying the UN Guiding Principles on Business and Human Rights and OECD Guidelines to assess salient risks across global supply chains.

Architect @ Isay Weinfeld Architects

São Paulo, BR

02.2023 - 08.2024

- Delivered high-end residential, hotel, and mixed-use projects across South America, North America, Europe, the Middle East, and Asia at one of Brazil's most prominent architecture studios.
- Scripted parametric and computational models in Rhino and Grasshopper for geometrically complex forms, supporting design development across projects.
- Developed building facades across the studio's design and technical development teams, carrying envelopes from the early compositional studies through to resolved construction build-ups on residential, hotel, and mixed-use buildings.
- Resolved facade build-ups and their materials, fixings, and jointing, working through preliminary structural sizing with the project's engineers before the detail was documented.
- Produced executive and technical documentation and coordination models across multiple project phases.
- Carried developments past feasibility into delivery, taking them through design development, technical documentation, and construction on buildings.

Trainee in Real Estate Product Development @ OSPA

São Paulo, BR

02.2022 - 10.2022

- Produced 15+ feasibility studies for mixed-use and residential developments across Brazil and the US (São Paulo, Rio de Janeiro, Porto Alegre, Miami) for developer clients.
- Developed volumetric massing studies in Revit, resolving circulation, unit layouts, ground-floor active frontage, and parking against zoning metrics.
- Produced images, plans, and diagrams and presented feasibility outcomes to developer clients.

Architect @ Felipe Hess Architects

São Paulo, BR

07.2021 - 02.2022

- Developed high-end residential projects in São Paulo and Rio de Janeiro from preliminary studies through technical documentation, working in Revit, AutoCAD, and SketchUp.
- Produced BIM documentation in Revit and construction drawings across design phases.
- Designed and detailed the facades of residential and commercial buildings, resolving materials, openings, and envelope build-up from preliminary studies through to construction documentation.
- Took part in client meetings and produced preliminary design studies to align proposals with client briefs.

Intern in Project Management @ Itaú-Unibanco

São Paulo, BR

08.2020 - 07.2021

- Reviewed technical documentation from architecture and engineering firms prior to construction authorization, checking drawings against building, accessibility, and fire-safety norms (NBR standards).
- Supported technical review of new office towers under construction at the bank's São Paulo headquarters campus, evaluating design documentation for compliance and environmental performance.

Independent Consultant @ Self-employed

São Paulo, BR and Copenhagen, DK

07.2018 - Present

- Took on independent projects, software, and consulting for clients across the AEC sector, alongside studies and full-time roles.
- Co-founded and ran an architectural visualization studio, managing 10+ clients, project scoping and delivery, and hiring staff.
- Produced architectural renders, humanized plans, and visualizations to communicate residential and commercial designs to investors and end buyers.
- Designed and delivered residential architecture and renovation projects for private clients with a collaborator, and entered open design competitions, alongside the bachelor's degree

EDUCATION

Master's Degree in Architecture Computation @ The Royal Danish Academy

Copenhagen, DK

07.2024 - 07.2026

Semester Programme in Building Technology @ Architecture Association

London, UK

07.2022 - 01.2023

Summer School in Parametric Design @ Architecture Association

London, UK

06.2019 - 07.2019

07.2018 - 12.2023

PROJECTS**Computational Deployable Structures Workshop @ Southeast University x The Royal Danish Academy****Nanjing, CN**

- Selected as one of a small group from The Royal Danish Academy for a two-week international workshop at Southeast University, applying origami-based deployable-structure principles (used in satellite deployment) to architectural structures.
- Developed parametric models exploring foldable geometry, material systems, and structural performance, working across computational design, geometry, and engineering.

Rammed Blue Biomass & Computational Optimization @ The Royal Danish Academy**Copenhagen, DK**

- Developed a new construction technique and material system using blue biomass (seashells and algae), applying LCA metrics and parametric simulations to optimize structural performance and environmental impact.
- Project was selected as a semester highlight and served as the material foundation for the school's installation at the Venice Architecture Biennale 2025, presented in collaboration with CITA, GXN, and 3XN at the Arsenale.

Venice Architecture Biennale 2025 @ The Royal Danish Academy, CITA, GXN, 3XN**Venice, IT**

- Contributed to the Matanzas panel by developing geospatial mappings to analyze local material sources and supply flows, producing cartographic work that informed the site's material research.
- Contributed to the Veneto panel by producing the physical exhibition panels displayed in the 7-metre installation at the Arsenale, which used the blue biomass composite technique developed during the semester project.

SKILLS

- Digital Tools: Rhino + Grasshopper, Revit, AutoCAD, Adobe Suite (InDesign, Illustrator, Photoshop)
- building_and_facade: Facade and envelope design, Construction detailing and technical documentation, Multidisciplinary BIM coordination, Daylight and solar simulation (Ladybug)
- Data & Analysis: Python, QGIS, SQL, Power BI, Excel / VBA, HTML
- Languages: English (fluent), Portuguese (native), Spanish (fluent), Danish (limited working proficiency), Italian (limited working proficiency)
