PROFILE

Experience across real estate development and sustainability consulting, from feasibility and financial modeling to ESG due diligence, building energy assessment, and climate risk work on internationally financed infrastructure. Recently completed an M.Arch. in Architecture Computation at The Royal Danish Academy, with a focus on data-driven approaches to real estate and sustainability. Hands-on skills span feasibility and financial modeling, building energy and environmental performance analysis, GIS, and structured analytical tools in Excel, Power BI, and Python. Motivated by work where real estate, sustainability, and rigorous analysis intersect.

EXPERIENCE

Project Assistant in International Infrastructure Projects @ Sweco Danmark A/S

Copenhagen, DK

02.2026 - 07.2026

- Support consulting teams delivering internationally funded infrastructure projects in water, energy, and transport across emerging and developing economies, financed by development banks including the World Bank, EBRD, IFDK, KfW and EIB.
- Authored climate risk assessments for major water supply projects following JASPERS and EBRD climate-proofing guidance, screening hazards against projections data and rating risk by exposure and vulnerability for each asset.
- Developed a pricing tool to support bid decisions, parametrizing expert fee bands and project economics for financial viability testing of tender configurations.
- Contributed to the technical and methodology sections of tender proposals, articulating Sweco's delivery approach for infrastructure project bids.
- Engaged national water agencies and government counterparts during the field missions to align on rehabilitation priorities and collect technical and geographic project data.

Intern in Responsible Business Conduct @ Ramboll Management Consulting

Copenhagen, DK

05.2025 - 08.2025

- Conducted human rights due diligence for corporate clients, applying the UN Guiding Principles on Business and Human Rights and OECD Guidelines to assess salient risks across global supply chains.
- Developed a salience-based human rights due diligence, scoring risks across business units and supply chains by probability, scale, and scope to automatically prioritize salient risks.
- Ran a peer benchmarking analysis for a corporate client, comparing its responsible business and human rights practices against industry competitors across multiple service areas to identify gaps, competitive advantages, and opportunities to strengthen its positioning.
- Led an internal market study mapping 20+ critical raw materials supply chains to identify prospective clients and new ESG service lines, connecting regulatory drivers to concrete business development targets.

Architect @ Isay Weinfeld Architects

São Paulo, BR

02.2023 - 08.2024

- Delivered high-end residential, hotel, and mixed-use projects across South America, North America, Europe, the Middle East, and Asia at one of Brazil's most prominent architecture studios.
- Built a Grasshopper plugin in Python that generates bespoke staircases from a floor plan, cutting staircase modeling from days to around 20 minutes and enabling far more design iterations and geometric complexity.
- Presented the tool in a studio workshop and supported its adoption by colleagues across 10+ projects.
- Coordinated multidisciplinary inputs (structural, HVAC, electrical, lighting) into a single Revit model.

Trainee in Real Estate Product Development @ OSPA

São Paulo, BR

02.2022 - 10.2022

- Produced 15+ feasibility studies for mixed-use and residential developments across Brazil and the US (São Paulo, Rio de Janeiro, Porto Alegre, Miami) for developer clients.
- Ran early-stage financial feasibility on candidate sites, sizing investment and return against buildable area, unit mix, price per square metre, and parking to test viability.
- Produced images, plans, and diagrams and presented feasibility outcomes to developer clients.

Co-Founder @ VIZU

São Paulo, BR

02.2022 - 10.2022

- Co-founded and ran an architectural visualization studio, managing 10+ clients, project scoping and delivery, and hiring staff.
- Produced architectural renders, humanized plans, and visualizations to communicate residential and commercial designs to investors and end buyers.

Architect @ Felipe Hess Architects

São Paulo, BR

07.2021 - 02.2022

- Developed high-end residential projects in São Paulo and Rio de Janeiro from preliminary studies through technical documentation, working in Revit, AutoCAD, and SketchUp.
- Carried out a zoning and feasibility study under São Paulo's master plan for residential buildings, determining buildable potential, apartment sizing, and compliance with fire and elevator regulations.

Intern in Project Management @ Itaú-Unibanco**São Paulo, BR***08.2020 - 07.2021*

- Reviewed technical documentation from architecture and engineering firms prior to construction authorization, checking drawings against building, accessibility, and fire-safety norms (NBR standards).
- Built a VBA-powered Excel dashboard tracking the bank's corporate furniture inventory across locations, replacing a manual process and speeding up procurement for new-building fit-outs.
- Assessed the environmental and energy performance of buildings the bank was acquiring or leasing, reviewing consumption data, efficiency ratings, and certifications as part of internal due diligence.

EDUCATION M.Arch. in Architecture Computation @ The Royal Danish Academy**Copenhagen, DK***07.2024 - 07.2026***Semester Programme in Building Technology @ Architecture Association****London, UK***07.2022 - 01.2023***Summer School in Parametric Design @ Architecture Association****London, UK***06.2019 - 07.2019***B.Arch. in Architecture and Urbanism @ Mackenzie University****São Paulo, BR***07.2018 - 12.2023***PROJECTS House Price Prediction - Competition****Copenhagen, DK**

- Built a predictive model for real estate valuation using ensemble learning (XGBoost, LightGBM, Ridge, CatBoost) and feature engineering on structured property and financial data, finishing in the top 2% of competitors.

Real Estate Development Recommendation Tool @ The Royal Danish Academy**Copenhagen, DK**

- Built a machine learning tool that generates site-specific development recommendations for buildings in Copenhagen by integrating financial, social, sustainability, and geospatial data.
- Designed a user interface allowing different stakeholders to adjust impact drivers and weighting, with predictive outputs aligned to ESG priorities and local development conditions.

Master's Thesis, Computational Urban Analysis for Intensification Strategy @ The Royal Danish Academy**Copenhagen, DK**

- Developed a computational framework to identify underused spaces in the historic city center of São Paulo, Brazil, combining urban morphology analysis, land use data, and social vulnerability indicators.
- Built an algorithm that uses urban data, including building typology, use patterns, regulatory conditions, and building use, to generate programmatic and morphological typologies for urban intensification, aligned with the city's existing urban policies.
- Integrated multiple geospatial datasets in QGIS to map spatial relationships between buildings, zoning conditions, and social context at the neighborhood scale.

SKILLS

- Data & Analysis: Python, QGIS, SQL, Power BI, Excel / VBA, HTML
- Digital Tools: Rhino + Grasshopper, Revit, AutoCAD, Adobe Suite (InDesign, Illustrator, Photoshop)
- ESG & Sustainability: CSRD, Double Materiality, EU Taxonomy, UNGPs, OECD Guidelines, HRDD, HRIA, LCA (Life Cycle Assessment)
- Real Estate & Urban: Real estate feasibility modeling, Zoning and land use regulatory analysis, Urban morphology and spatial analysis
- Languages: English (fluent), Portuguese (native), Spanish (fluent), Danish (limited working proficiency), Italian (limited working proficiency)
