

Antonio Carmagnani

Copenhagen, DK • +45 71 49 62 06 • antoniocarmagnani@gmail.com

PROFILE

Experience in real estate development, feasibility, and financial modeling, grounded in zoning and land-use analysis across multiple markets. Recently completed an M.Arch. in Architecture Computation at The Royal Danish Academy, with a focus on computational and data methods for real estate and urban development. Hands-on skills span feasibility and P&L modeling, zoning and buildable-potential analysis, and volumetric studies in Revit. Motivated by work where real estate, finance, and design intersect.

EXPERIENCE **Project Assistant in International Infrastructure Projects @ Sweco Danmark A/S**

Copenhagen, DK

02.2026 - Present

- Support consulting teams delivering internationally funded infrastructure projects in water, energy, and transport across emerging and developing economies, financed by development banks including the World Bank, EBRD, IFDK, KfW and EIB.
- Authored climate risk assessments for major water supply projects following JASPERS and EBRD climate-proofing guidance, screening hazards against projections data and rating risk by exposure and vulnerability for each asset.
- Joined a field mission across Baku's water supply system, assessing asset condition and identifying technical, social, environmental, and human rights risks through site inspections and interviews.
- Reviewed engineering designs across multiple infrastructure projects under FIDIC Yellow Book arrangements, checking specifications against subconsultants' technical drawings.
- Developed a pricing tool to support bid decisions, parametrizing expert fee bands and project economics for financial viability testing of tender configurations.

Intern in Responsible Business Conduct @ Ramboll Management Consulting

Copenhagen, DK

05.2025 - 08.2025

- Conducted human rights due diligence for corporate clients, applying the UN Guiding Principles on Business and Human Rights and OECD Guidelines to assess salient risks across global supply chains.
- Built a Human Rights Impact Assessment tool, mapping 40+ salient human rights risks across supply chains, with severity scoring to prioritize the most material risks.
- Developed a client-facing overview of the firm's real estate ESG due diligence services, centered on building energy and decarbonization assessments aligned with EU building performance regulations.

Architect @ Isay Weinfeld Architects

São Paulo, BR

02.2023 - 08.2024

- Delivered high-end residential, hotel, and mixed-use projects across South America, North America, Europe, the Middle East, and Asia at one of Brazil's most prominent architecture studios.
- Coordinated multidisciplinary inputs (structural, HVAC, electrical, lighting) into a single Revit model.
- Took part in client and consultant meetings to align design proposals with project requirements across disciplines.

Trainee in Real Estate Product Development @ OSPA

São Paulo, BR

02.2022 - 10.2022

- Produced 15+ feasibility studies for mixed-use and residential developments across Brazil and the US (São Paulo, Rio de Janeiro, Porto Alegre, Miami) for developer clients.
- Ran early-stage financial feasibility on candidate sites, sizing investment and return against buildable area, unit mix, price per square metre, and parking to test viability.
- Analyzed municipal master plans and land-use law to determine development potential, unit counts, apartment sizing, and setback rules, identifying regulatory opportunities to maximize buildable value.
- Produced images, plans, and diagrams and presented feasibility outcomes to developer clients.

Co-Founder @ VIZU

São Paulo, BR

02.2022 - 10.2022

- Co-founded and ran an architectural visualization studio, managing 10+ clients, project scoping and delivery, and hiring staff.

Architect @ Felipe Hess Architects

São Paulo, BR

07.2021 - 02.2022

- Developed high-end residential projects in São Paulo and Rio de Janeiro from preliminary studies through technical documentation, working in Revit, AutoCAD, and SketchUp.
- Carried out a zoning and feasibility study under São Paulo's master plan for residential buildings, determining buildable potential, apartment sizing, and compliance with fire and elevator regulations.
- Produced BIM documentation in Revit and construction drawings across design phases.

Intern in Project Management @ Itaú-Unibanco**São Paulo, BR**

08.2020 - 07.2021

- Reviewed technical documentation from architecture and engineering firms prior to construction authorization, checking drawings against building, accessibility, and fire-safety norms (NBR standards).
- Assessed the environmental and energy performance of buildings the bank was acquiring or leasing, reviewing consumption data, efficiency ratings, and certifications as part of internal due diligence.
- Supported technical review of new office towers under construction at the bank's São Paulo headquarters campus, evaluating design documentation for compliance and environmental performance.
- Built a VBA-powered Excel dashboard tracking the bank's corporate furniture inventory across locations, replacing a manual process and speeding up procurement for new-building fit-outs.

EDUCATION M.Arch. in Architecture Computation @ The Royal Danish Academy**Copenhagen, DK**

07.2024 - 07.2026

Semester Programme in Building Technology @ Architecture Association**London, UK**

07.2022 - 01.2023

Summer School in Parametric Design @ Architecture Association**London, UK**

06.2019 - 07.2019

B.Arch. in Architecture and Urbanism @ Mackenzie University**São Paulo, BR**

07.2018 - 12.2023

PROJECTS Master's Thesis, Computational Urban Analysis for Intensification Strategy @ The Royal Danish Academy**Copenhagen, DK**

- Developed a computational framework to identify underused spaces in the historic city center of São Paulo, Brazil, combining urban morphology analysis, land use data, and social vulnerability indicators.
- Built an algorithm that uses urban data, including building typology, use patterns, regulatory conditions, and building use, to generate programmatic and morphological typologies for urban intensification, aligned with the city's existing urban policies.
- Integrated multiple geospatial datasets in QGIS to map spatial relationships between buildings, zoning conditions, and social context at the neighborhood scale.

Real Estate Development Recommendation Tool @ The Royal Danish Academy**Copenhagen, DK**

- Built a machine learning tool that generates site-specific development recommendations for buildings in Copenhagen by integrating financial, social, sustainability, and geospatial data.
- Designed a user interface allowing different stakeholders to adjust impact drivers and weighting, with predictive outputs aligned to ESG priorities and local development conditions.

SKILLS

- Data & Analysis: Python, QGIS, SQL, Power BI, Excel / VBA, HTML
- Digital Tools: Rhino + Grasshopper, Revit, AutoCAD, Adobe Suite (InDesign, Illustrator, Photoshop)
- ESG & Sustainability: CSRD, Double Materiality, EU Taxonomy, UNGPs, OECD Guidelines, HRDD, HRIA, LCA (Life Cycle Assessment)
- Real Estate & Urban: Real estate feasibility modeling, Zoning and land use regulatory analysis, Urban morphology and spatial analysis
- Languages: English (fluent), Portuguese (native), Spanish (fluent), Danish (limited working proficiency), Italian (limited working proficiency)
